

COUNTERFEIT DETECTOR

MODEL INFRARED MCD-900

Features :

- Accurate detection using the latest precision infrared and optical components.
- Easy to use technology.
- Reduces your exposure to accepting counterfeit bank notes.
- Precision infrared and optical sensors.
- Sturdy metal frame construction.
- Automatic on/off sensor.

Efficiency and precision describe the new MCD-900 counterfeit detector, the most efficient detector now on the market. With its camera and infrared monitor, verifies currencies and documents for up to 70 countries, with 99% precision. Used by banks, casinos, exchange offices and stores all over Europe for several years.

Every institution that handles currency should have a detector in place, to help reduce counterfeiting.
